

Technical Data Sheet

Banana Split-Dehydrated (500g)

Product Description			
Banana Dehydrated Yeast is developed by WHC Lab.			
Banana Split Dehydrated 500g packs contain the yeast species <i>Saccharomyces cerevisiae</i> . Our dried Hefeweizen strain, unlike other wheat/hefe strains on the market, is non-diastatic. Produces high amounts of isoamyl acetate which is perceived as a banana flavor balanced with less dominant aromatics of apple, clove, and plum. The esters are more dominant at high temperatures and at lower pitches. Leaves a crisp finish, and raising the temperature can increase banana flavor.			
This is a top-cropping ale yeast, that produces a thick krausen. The use of antifoam and/or leaving more head space would be recommended. Origin: Weihenstephan			
Guidelines			
Oxygenation and/or rehydration may not be needed for generation 0 but may be beneficial. It is recommended to have a pitch rate of at least 50g per hl of wort for a standard gravity brew (1.045). The pitch rate is between 50-150g/hl of wort.			
The intended fermentation temperature range is 19°C to 24°C.			
Ingredient Declaration			
Yeast	98.8% to 99.2%		
Emulsifier E491*	0.8% to 1.2% (*Sorbitan Monostearate)		
Technical Specification			
Yeast Strain	<i>Saccharomyces cerevisiae</i>		
Fermentation Temperature	19°C to 24°C		
ABV Tolerance	12%		
Nitrogen Demand	Medium		
Attenuation	73% to 80%		
Flocculation	Low to Medium		
Weight	0.5 kg		
Physical, Chemical and Microbiological properties			
Parameter	Unit of Measure	Value	Specification Value
Appearance	-	Fine granules (typically 3mm particle size)	-
Powder flow characteristics	-	Free flowing granules	-
Odor	-	Weak characteristic yeast smell	Typical
Color	-	Light brown/beige	Light brown/beige
Solubility	-	Miscible in water & ethanol solutions	-
Dry matter	%	95.4	> 92
Moisture	%	4 to 6	< 8
Total Yeast Plate Count	Cfu/g	1.3×10^{10}	$>10^{10}$
Direct Live Cell Count	Cells/g	1.9×10^{10}	$> 1.9 \times 10^{10}$
Lactic Acid Bacteria	Cfu/g	< 10	$< 10^3$
Acetic Acid Bacteria	Cfu/g	< 10	$< 10^4$
Wild Yeasts	Cfu/g	< 10	$< 10^5$
Moulds	Cfu/g	< 10	$< 10^2$
Coliforms	Cfu/g	< 10	$< 10^2$
<i>Escherichia coli</i>	Cfu/g	Absent in 1 g	Absent in 1 g
<i>Staphylococcus aureus</i>	Cfu/g	Absent in 1 g	Absent in 1 g
<i>Salmonella spp</i>	Cfu/g	Absent in 25 g	Absent in 25 g
<i>Listeria monocytogenes</i>	Cfu/g	Absent in 25 g	Absent in 25 g

Allergens*

Banana Split Dehydrated Yeast contains no added allergens.
 *EU Regulation 1169/2011 (Food Information Regulations) (Annex II)

GMO

Banana Split Dehydrated Yeast does not contain genetically modified organisms or materials.

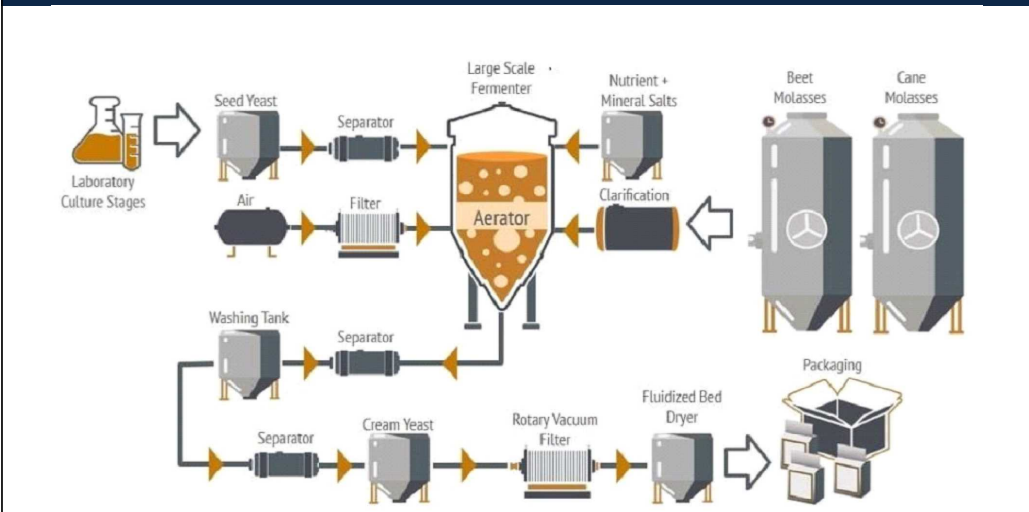

Packaging

Banana Split Dehydrated Yeast is available in 500g vacuum-packed silver foil packs.
 This material complies with relevant food-contact legislation, including, EU Regulation 1935/2004 (materials intended for contact with food), EU Regulation 1245/2020 (plastic materials intended for contact with food), EU Regulation 2023/2006 (GMP for materials intended for contact with food), and FDA CFR 21 (174-179) (USA).

Storage and Handling

Storage Conditions:	Store at cool to ambient temperatures (ideally 5°C to 15°C), dry, and well-ventilated environment.
Shelf life:	3 years from date of production, if vacuum seal is not broken, and if stored as outlined above.
Handling:	Once opened, re-seal to keep out air and water. For best results, store re-sealed packs in a refrigerator (0°C to 10°C) and use promptly. Please note expiry date on packs prior to opening. Note: When added to water or a water solution, Banana Split Dehydrated Yeast releases CO ₂ , especially on substrates high in sugars or starch. Ensure adequate ventilation to keep levels below advised exposure limits. Please refer to the Material Safety Data Sheet/MSDS for further advice.
