Pineapple Passion Dehydrated Yeast

Product Description

Pineapple Passion Dehydrated Yeast is developed by WHC Lab.

A new yeast selected for its ability to craft juicy tropical brews with a vibrant pineapple character. This exciting and innovative strain offers key benefits, including high levels of biotransformation, haze stability, and fast fermentation.

Guidelines

Oxygenation and/or rehydration for generation 0 may be beneficial, but not necessary. We recommend a pitch rate of at least 50g per hl of wort for a standard gravity brew (1.045). The pitch rate is between 50-150g/hl of wort.

The intended fermentation temperature range is 22°C to 26°C [71°F to 79°F].

Storage and Handling

Storage Conditions:	Store at cool to ambient temperatures (ideally 5°C to 15°C or 41°F to 59°F), dry, and well-ventilated environment.
Shelf life:	3 years from date of production, if vacuum seal is not broken, and if stored as outlined above.
Handling:	Once opened, re-seal to keep out air and water. For best results, store re-sealed packs in a refrigerator (0°C to 10°C or 32°F to 50°F) and use promptly. Please note expiry date on packs prior to opening. When added to water or a water solution, Pineapple Passion Dehydrated Yeast releases CO₂, especially on substrates high in sugars or starch. Ensure adequate ventilation to keep levels below advised exposure limits. Please request a Material Safety Data Sheet/MSDS for further advice.
