

Technical Data Sheet

Prometheus-Dehydrated Yeast (500g)

Product Description

Prometheus Dehydrated Yeast is developed by WHC Lab.

Prometheus is a wonderfully fruity yeast that produces massive amounts of esters of fig, licorice and other rich flavors. Interacts very nicely with the molasses and/or cane juice to bring out the complex flavors in the resulting spirit. Good fermentation performance and ethanol tolerance mean it is an excellent choice for rum production.

Guidelines

Oxygenation and/or rehydration may not be needed.

Pitch rate: 70-100g/hl

The intended fermentation temperature range is 25°C to 35°C.

Storage and Handling

Storage Conditions:	Store at cool to ambient temperatures (ideally 5°C to 15°C), dry, and well-ventilated environment.
Shelf life:	3 years from date of production, if vacuum seal is not broken, and if stored as outlined above.
Handling:	<p>Once opened, re-seal to keep out air and water. For best results, store re-sealed packs in a refrigerator (0°C to 10°C) and use promptly. Please note expiry date on packs prior to opening.</p> <p>Note: When added to water or a water solution, Prometheus Dehydrated Yeast releases CO₂, especially on substrates high in sugars or starch. Ensure adequate ventilation to keep levels below advised exposure limits. Please refer to the Material Safety Data Sheet/MSDS for further advice.</p>
